

# ASTR 1020 Report #1

## Light

Using the internet and non-internet sources research the early attempts of scientists to determine the properties of light. Specifically look for references to work done by Galileo Galilei, Isaac Newton, Olaus Roemer, Armand Fizeau, Albert Michelson, Max Planck, and Albert Einstein.

The report will be **three full typed** pages long (**not** including the title and your name) with standard margins, double spaced with a 12 pt times New Roman font.

You will need to list your sources of information which must include at a minimum two non-internet sources (i.e. books or magazines not including your textbook).

Any plagiarism will result in a zero. If two people turn in the same report (i.e. if a majority of the writing is the same) both people will get zeros.

This report is due on or before noon Friday 10/8/2010.
